SPINNING AND FLY RODS
COMPLETE WITH DELUXE CASES

REGISTERED and GUARANTEED

Every Fenwick rod is registered by number at the factory. We need only your name to make it valid. Every rod is built to give you absolute satisfaction and guaranted against defective workmanship and materials.

(1)

All 2-piece rods. **Incomparable Fenwick Feralite® Fly Rods**

Fenwick designed a wholly new line of glass fly rods with Bamboo Action. We invite the critical bamboo man to pick up one of these new rods and feel the smooth action and responsive power. For the angler who "cut his teeth" on the fiberglass rod. Fenwick offers a broad line of "smooth fast action" rods which take every possible advantage of the structural material, fiberglas. You will marvel at the Feralite thin-wall construction—at the incredibly powerful and responsive action—and at the achievement of "true one-piece action" thru the new Feralite joining principle which does away with metal ferrules. Take particular note of the dramatic advancements made in fly rod construction at Fenwick.

garcia BROWN SERIES

☆☆☆☆

The Four Star line of Garcia-Conolon rods is a series of quality rods offering the angler a complete range of actions from which to choose. They include big game rods, plus spincasting and bait-casting rods ranging from light actions all the way up to a muskie rod powerful enough to cast a six-ounce lure, and fly rods that cover the vast majority of most fishermen's needs.

In the area of spinning, the Brown rod actions range from little five-foot, ultra-light wands casting as little as one sixteenth of an ounce, to big 11′4″ surfcasting rods capable of hurling five ounces with ease, and from general purpose rods to specially designed actions for highly specialized fishing.

SUPER (128)

Trilene MONOFILAMENT

Here's a line so different it's patented. It's the line that doesn't deteriorate from air, water or atmosphere as ordinary monofilament does. Berkley Trilene is the monofilament the "pros" and guides perfer. It's the line that wins the casting tournaments. It's the line that catches more fish — wins more consts. Sure, it costs more, but it's worth it. The build-in "lubricant" keeps it lively longer. You have more fishing fun — save money in the long run.

Two 100 Yard Coils attached

LEAD CORE LINE FOR DEEP TROLLING WITHOUT BULKY TERMINAL TACKLE

Now you can get down deep without using heavy, bulky sinkers. Garcia Lead Core Line is perfect for trolling and for fishing in fast currents or strong tide waters. The flexible lead core is permanently sheathed in a strong, tightly-braided nylon sleeve, braided to the same rigid specifications as all Garcia lines. Garcia Lead Core Line is heavy enough to get down fast, and flexible enough to handle easily and spool well on your reel. The line is color-coded every ten yards, too . . . so you can tell exactly how much line you have out. With each spool is a handy color chart decal, which you can affix to your rod, reel, or fighting harness, that lets you calculate your fishing depth accurately by boat speed and amount of line out.

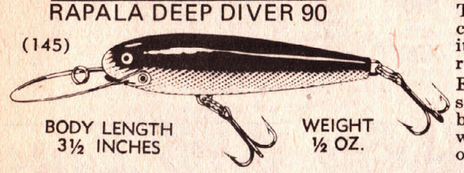
RAPALA DEEP DIVER 90



(145)

BODY LENGTH 3 1/2 INCHES

WEIGHT 1/2 OZ.

The new Rapala with the "new-action" for huge trophy fish. The Rapala Deep-Diver 90 floats at rest, dives almost vertically upon retrieve and will hold its depth even at a very fast retrieve or troll.

Effective when trolling for deep schooled feeders or "bottom bumping" for the very deep-water trophies. For a shallow or medium retrieve or troll, reduce speed of lure.

Our new patented Flectolite is a major breakthrough in fishing lure finishes. It goes a lot farther than just a bright, shiny surface. It actually breaks light rays down into all the prismatic colors. Any source of light, in any kind of water condition, will reflect all the colors of the spectrum: blue, green, yellow, orange, red, and violet. All these colors duplicate the brilliant flash of bait fish. This new finish plus a great action makes it a perfect lure.

PUMA — WORLD'S FINEST HUNTING KNIFE

Rugged Strength—Super Sharpness
Perfect Balance—Lifetime Service

This superb knife— a masterpiece of old-world craftsmanship — is made by the famous Puma-Werke of Solingen, West Germany. They named it "For the White Hunter" because it was designed for men who lead Safaris—whose lives depend on the best equipment that man can produce and money can buy! These men need a hunting knife that can skin big game — that slices through the toughest hides, through thick bones or heavy branches— yet is sharp and delicate enough to slice slippery green twigs — or skin a tomato! This knife was designed and carefully fashioned to do every outdoor job — with no effort! Nothing has been spared to make it the best.

A MUST FOR EVERY ANGLER

This new deluxe model of the famous Rapala Fish 'N Fillet was designed for easy fish-filleting. But, it is equally handy around campsite, kitchen or charter boat.

The new knife features a progressively, double tapered steel blade. The steel is a combination of carbon, molybdenum and chronium which gives all the advantages of stainless steel, plus a longer lasting cutting edge. Yet, the knife has the flexibility for performing even the most delicate filleting and boning operations.

The molded handle is a black satin ebony color — guaranteed not to break or shatter, for the life of the knife.

Accompanying the Presentation Fillet Knife is a sheath of top-grain tanned oxhide embossed with traditional Laplander designs. Inside the sheath is a plastic blade guard. A top belt loop allows the sheath the addede safety feature of a free swing.

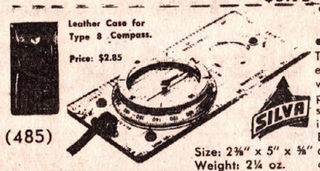
Type 1 EXPLORER

List Price $10.50

● Liquid Filled ● Transparent Protractor Plate ● Transparent Housing

Leather Case for Type 8 Compass. Price: $2.85



(485)

Size: 2¾" x 5" x ⅜"
Weight: 2¼ oz.

This professional quality compass is large enough to reduce human error to an absolute minimum. Transparent, liquid filled housing with hairline meridian lines in bottom of housing permit accurate plotting or transfer of angles. Sensitive 1½" needle holds extremely steady. Sapphire jewel bearing. End of plate beveled and scale in inches and tenths of an inch. Scale on side of plate in millimeters. Built-in magnifying glass. Luminous points and luminous orienting arrow. Waterproof. Graduated 0° to 360°. Built-in mechanism to adjust for declination. Instructions.

LIQUID — The ultimate in compass perfection. The needle is enclosed in liquid, which is the fastest known method of stopping needle action, and holding the needy steady. Liquid compasses are waterproof and 100% accurate to 40° below zero. Tested stopping time — 4 seconds.

INDUCTIONED DAMPENED COMPASS — Faster reading than the standard compasses. The highly magnetized and sensitive needle swings in a copper or aluminum bowl, thus forming induced electricity, similar to a generator. As the needle swings the flow of electricity changes and stops the needle with surprising speed. Tested reading time—17 secs.
